DETAILED ACTION

1. This action is in response to the RCE filed on 3/11/2009.
2. **Claims 1, 5-6, 8-16, 18-24, and 26** are pending (claims 2-4, 7, 17, and 25 were canceled).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim(s) 1, 5-6, and 8-12 is/are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a different state or thing. See page 10 of *In Re Bilski* 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. The method claim 1 including steps of ... is broad enough that the claim could be completely performed mentally or manually without a machine nor is any transformation apparent.

Allowable Subject Matter

4. **Claims 13-16, 18-24, and 26** are allowed. The prior art alone or in combination fail to teach or make obvious on the following when considered in combination with other limitations

in the claim: a relationship between the filtered phase metric signal and the stuff rate signal is piece-wise linear as recited in independent claims 13 and 24.
